DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 27-30, 35-46, and 51-56 are drawn to a method of establishing a packet tunnel and upon detecting a network attack, select and establish a new packet tunnel, classified in class 709, subclass 235.
- II. Claims 18-26 and 47-50 are drawn to a method of establishing a packet tunnel and establishing for the packet tunnel a truncated reservation path, classified in class 709, subclass 239.
- III. Claims 31-34 are drawn to a method of maintaining a set of alternate multicast network addresses and a set of alternate unicast network address, and assigning the multicast addresses to packet tunnel terminating on the network device and assigning the unicast addresses to packet tunnel originating from the network device.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such setting up a new packet tunnel to avoid the network attacks. In the case of invention II, it also has a separate utility such as establishing a packet tunnel and establish for the packet tunnel a truncated reservation path within an access link to avoid attacks. In the case of invention III, the yet another separate utility is to use both

Art Unit: 2141

unicast and multicast addressing assign to a packet tunnel originating and terminating at different end of the tunnel of the network devices.

3. Because these inventions are distinct for at least the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Kent J. Sieffert on 4/13/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
